This submission responds to the Commissions request on March 26, 2012 for more information regarding additional activity on amended reports:

The DNC regularly reviews its reports to ensure that all of its activity is properly disclosed and appropriately amends its reports to include additional receipts and disbursements when necessary. In addition to these standard adjustments, nearly all of the \$112,596.47 in additional disbursements on the 2011 September Monthly report, amended in November 2011, were the result of an inadvertent error in reporting disbursements which are treated in part as in-kind transfers to the state parties. When reporting such disbursements, the DNC reports the full payment to the vendor on Line 21(b). An additional entry on Line 21(b) is reported as a negative disbursement to the vendor in the amount of the state party's allocable portion of the payment. A corresponding entry is reported on Line 22 as an in-kind transfer to the state party in the same amount.

On this report, while both the negative disbursements to the vendors on Line 21(b) and the corresponding transfers to the state parties on Line 22 were reported, the full payments to the vendors on Line 21(b) were not included. The DNC promptly filed an amended report to correct the public record. The DNC consistently reviews its reporting process in order to make necessary improvements to its procedures and ensure that its public filings are as accurate as possible.
